SUMMARY

Full-stack developer and first-year AI/ML undergrad with 5+ years of programming experience, specializing in React, Next.js, and Python-based backends. Built production-grade systems spanning on-orbit ML pipelines, real-time disaster response platforms, and client web projects. Currently expanding into AI/ML engineering with hands-on experience in geospatial foundation models and risk classification systems. Passionate about high-performance systems, ethical hacking, and building software that solves real problems.

EXPERIENCE

Full Stack Developer

January 2025 – Present, Hyderabad, IN

Freelancer

- Developed full-stack web applications for clients focused on data processing, automation, and workflow improvement.
- Built secure applications with integrations for multiple APIs and databases.
- Created responsive frontend interfaces and backend systems using React, Next.js, Node.js, TypeScript, MongoDB, Express.js, and Supabase.
- Collaborated with clients and team members to identify technical challenges and deliver practical solutions.
- Improved efficiency by developing custom app-based tools and features tailored to client requirements.

Design Intern

June 2025 – August 2025, Hyderabad, IN

Celebrano Events and Entertainments Pvt. Ltd

- Designed large-format hoarding and promotional banner concepts for events and marketing campaigns.
- Assisted in poster and visual marketing material creation using digital design tools.
- Contributed to stage design ideation and prototyping for live events and exhibitions.
- Supported creative and operational tasks across the office in a fast-paced event production environment.
- Collaborated with team members to meet project deadlines and event requirements.

PROJECT

FloodSense — Intelligent SAR Flood Prediction with Orbital Compute

April 2026 – April 2026

- Fine-tuned IBM TerraMind v1 Tiny on Sen1Floods11 dataset with a UperNet decoder, achieving mIoU of 0.82 vs 0.61 baseline.
- Designed an on-orbit inference pipeline targeting edge hardware, cutting satellite downlink bandwidth by 99.9% (1,024 MB → 5 KB).
- Built end-to-end ML system on Sentinel-1 SAR imagery (VV + VH bands), enabling flood detection through clouds and at night.
- Deployed a FastAPI REST service with web app frontend for interactive disaster assessment and CLI inference support.

Crisis Support — Real-Time Disaster Response & Volunteer Coordination Platform

March 2026 – March 2026

- Built a role-based disaster response platform (Victim/Volunteer) with real-time request assignment, dynamic dashboards, and live Socket.io updates.
- Integrated Mapbox GL JS with radius overlays and real-time markers for volunteer proximity and active crisis zone visualization.
- Designed a REST API with Express + MongoDB for NGO inventory, volunteer coordination, and victim request management.

Full Circle — Business Website (Client Project)

thefullcircle.co.in • May 2025 – June 2025

- Developed and deployed a responsive business website with integrated APIs for **dynamic data handling** and **real-time functionality**.
- Utilized **Airtable** as database for structured data and content management.
- Built scalable and responsive frontend components ensuring performance, accessibility, and cross-device compatibility.

EDUCATION

Bachelor of Technology in Artificial Intelligence and Machine Learning

Greenidhi Institute of Science and Technology • Yamnampet, Telangana, India • 2029

Intermediate (Class 11 and 12)

Deeksha Junior College • ECIL, Hyderabad, Telangana, India • 2025 • 85.2%

• Awarded **Highest Attendance** in Intermediate (2023–2024)

High School (Class 10)

CAL Public School • Kapra, Hyderabad, Telangana, India • 2023 • 81.6%

SKILLS

Programming Languages: Python, C, C++, Bash/Shell

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS

Backend & Databases: Node.js, Express, FastAPI, PostgreSQL, MongoDB, SQL, Supabase

AI & ML: PyTorch, scikit-learn, NumPy, Pandas, IBM TerraMind, terratorch, Jupyter

Tools & Technologies: Git & GitHub, Docker, Linux, Figma, npm

Soft Skills: Problem Solving, Team Collaboration, Data Analysis, Adaptability
